You will create a new element in the output of the function.You need to minimize the number of missing values.Which three actions should you perform? Each correct answer presents part of the solution.NOTE: Each correct selection is worth one point.A.   Assign a value to the first value of x_lagged in the current block.B.   Use rxSet to store the last value of x_lagged in the current block.C.   Use rxSet to store the last value of x in the current block.D.   Use rxGet to retrieve the first value of x in the next block to be processed.E.   Use rxGet to retrieve a value stored in processing of the prior block.**Answer: ACD**QUESTION 20You have an Apache Hadoop Hive data warehouse.
